

## Weimaraner Club of NSW Easter Specialty 2016 Critiques

### Message from Judge Mr Raymond Yurick (Canada)

“Gobsmacked” is one of my favorite Australian slang terms and the best way to describe how I felt after judging your specialty. I will take great pride in boasting that my very first appointment aboard was for this wonderful breed. From the very first class to the end of the day it was very evident that the Weimaraner breeders in Australia have a very clear vision of type and sound functional movement. It was an honor to be asked to judge your specialty and a privilege to examine and evaluate such a large well-supported entry. Thank you all for the tremendous experience and the most enjoyable day.

It is awesome to judge specialties without a breeder bias, where the sum of all parts plays a greater importance than the pieces; especially how the symmetry of a well-made balanced dog of type translates into function. Every assignment for me is a learning experience and this quality entry gave me so much to assess and evaluate.

Before coming over I immersed myself in your extended standard and did an online seminar with Danna Massey, who has judged your Australian National. She stated that judging Weimaraners in Australia is a wonderful experience and I could not agree more.

For me Form plus Function equals Type in a gun dog. So much of my final decision-making came down to purpose full, functional, working type movement (agile, powerful, athletic, smooth, ground covering). Always staying true to key characteristics and proportions that set this breed apart from others. They are a noble, medium/large, sinewy, very muscular, well angulated front and rear, silver/grey hunting dog. With a pleasing shape and distinctive outline. (12:11 proportion)

Upon returning home, I looked through pictures and listened to my recorded comments. Beyond the numerous wonderful evaluations, I only have 3 areas of concern when it came down to lower place getters and non-placers. Shorter and Straighter return of upper arms, low on leg (elbow to ground VS withers to elbow) and in several cases a lack of difference in type between dogs and bitches being easily distinguished. (bitchy dogs, doggy bitches) In a large quality entry as this was, it literally came down to fine points in the end of many of the large classes to separate my placements.”

BOB #34 and Runner Up BOB #57

I could watch this dog and bitch go around the ring together all day, outstanding type translated into function, I still get goose bumps thinking about it

The remainder of the run offs to the end of the day came down to correct proportions and powerful ground covering side gait.

What a wonderful experience it was to evaluate such an outstanding entry in both varieties. Thank you to my tremendous ring steward for making my first Australian appointment seem like I lived there. Thank you to all the exhibitors for sharing your passion and dogs with me. Thank you to the Wei Club of NSW and Show Committee for the invitation and warm welcome!! You were a wonderful first impression of Australian quality dogs.
